Response to Questions regarding “Request for Proposals for Website Design”

Area	Questions	Response
3.0.2 - CMS	<ul style="list-style-type: none"> How many levels of access will you need, and for how many different areas of the site? 	At least three full access individuals and others TBD.
3.2.5 – Form Development	<ul style="list-style-type: none"> For the 10 forms, what types of features will the most advanced form include (i.e.- captcha, file uploads, etc.) 	Text only.
3.2.6 - Transit App Integration	<ul style="list-style-type: none"> Does Swiftly offer an API to integrate data into the new website? 	Yes – via an imbedded web page.
3.2.6 – Rider Alert System	<ul style="list-style-type: none"> Is this tied to Swiftly and the transit app integration? 	Preferably
	<ul style="list-style-type: none"> What kinds of alerts/notifications would you like to receive (i.e- when a bus arrives 10 mins early or if a bus is running late?, etc.)? 	Rider alerts should include an area where passengers can see alerts posted via twitter, sign-up to receive emails, or call a number for the latest information.
3.2.6 – Trip Planner Integration	<ul style="list-style-type: none"> Is this the same as the Google Maps Trip Planner 	Please see listed example.
